

County Appendix by District

New Mexico has 33 counties that are grouped into 14 judicial districts. These appendices provides county level data for key topics found in the main body of the FY 2017 Juvenile Justice Services (JJS) Annual Report. The county profiles are grouped by district number. County level data is presented by referral type [delinquent, probation violation, and status referral (non-delinquent)], by gender, age, race/ethnicity, action taken/disposition, and top offenses. In addition, there is information on case processing time, minors in possession/driving while intoxicated (MIP/DWI) offenses, probation violations for alcohol/drugs, juvenile probation officer (JPO) workload, and admissions to juvenile facilities. For background, the following table provides statewide data on both the number of referrals and the number unduplicated number of youth with a referral, by referral type.

Number of referrals and number of unduplicated youth with a referral, by referral type, Juvenile Justice Services, New Mexico FY 2017

Referral type*	Referrals		Unduplicated youth with a referral	
	Number	Percent	Number	Percent
Delinquent	8,804	77.1%	6,870	81.7%
Probation violation	884	7.7%	667	7.9%
Status (non-delinquent)	1,731	15.2%	1,606	19.1%
Total	11,419	100.0%	8,409	100.0%

*Total accrued offenses in FY 2017 was 18,191.

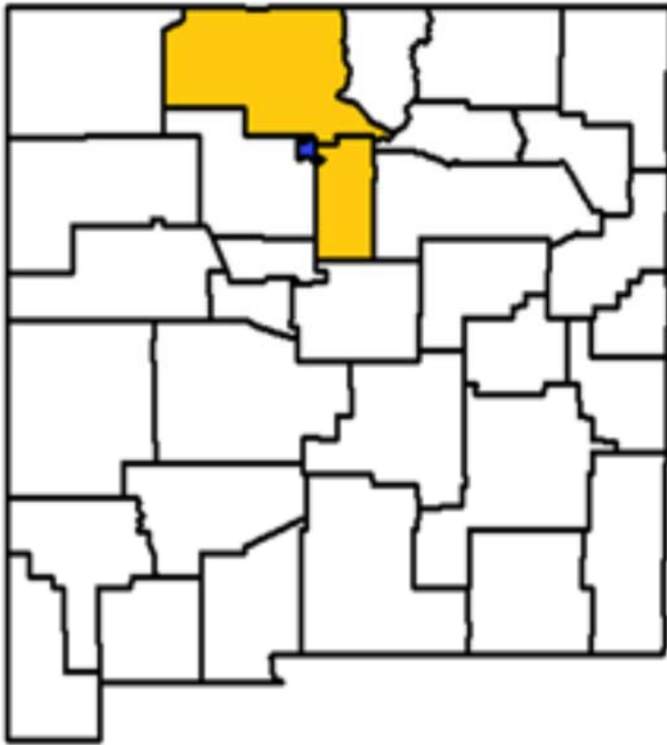

**Youth may appear more than once if they have referrals in multiple counties. Youth may have also accrued more than one type of referral during FY 2017.

Keeping in mind that a youth may have had multiple offenses per referral, the total accrued offenses in FY 2017 was 18,191. The most serious charge determined if a referral was processed as a delinquent, probation violation, status (non-delinquent) referral. Overall, there were 11,419 referrals involving 8,409 unduplicated youth.

In the county totals, youth may appear more than once if they have referrals in multiple counties or if they have more than one type of referral. For example, Jane Doe had two delinquent referrals, one is from Curry County and the other is from Roosevelt County. She would be counted twice, once for each county's referral total. In another example, John Doe had two referrals in FY 2017, one was a delinquent referral and the other was a probation violation referral. Therefore, he would be counted once in the delinquent referral total and once in the probation violation referral total.

In order to protect the confidentiality of youth, some county demographic tables have had counts and percentages replaced with an asterisk (*). If individual county numbers are needed, please send an email request to: JJSDataRequest@state.nm.us.

The reader is encouraged to refer back to key sections of the FY 2017 JJS Annual Report for clarification and assistance on definitions and methodologies used to collect the data included in the County Appendices.
